## About **AMREF INTERNATIONAL UNIVERSITY**

Amref International University (AMIU) was established in 2017 as a Premier Pan African University of health sciences fully owned by Amref Health Africa. AMIU is founded on the experience and intellect of Amref Health Africa, which is reputed with over 60 years of quality and innovative public and community health interventions in over 30 countries in Africa.

With this work, the need to train health workers in communities was evident and the response was short tenure training courses by the Amref Training Centre (AITC) and later the Directorate of Capacity Building (DCB), the predecessor of AMIU. These Amref training programmes run for over 40 years, have produced alumni spread throughout the world who have created the name recognition, reputation and brand that Amref is today. It was then evident that there was a need to train people at higher levels who would influence health policy, regulation and legislation. The University was thus established.

AMIU's focus is on training, research and extension in health sciences with emphasis on promotive, preventive, rehabilitative and palliative health. Its commitment is to progressively develop innovative programmes catering to the present as well as future Africa and global health needs. The University offers postgraduate, undergraduate, higher diploma, diploma, certificate programmes as well as Continuing Professional Development (CPD) courses that prepare human resource for health to serve throughout the health system.

AMIU seeks to train transformational leaders who will Inspire Lasting Change.

## MESSAGES FROM THE UNIVERSITY

“The health indicators in sub-Saharan Africa are still worrying, with unacceptably high infant and child mortality rates, and high maternal mortality rates. The frustration is that most of these deaths are from preventable causes, such as malaria and diarrhoea among children and pregnancy and child related complications among mothers, that can be successfully managed if there is access to proper primary health care.”

- H E Mr Festus Mogae, Chancellor, AMIU -

“Indeed, access to Universal Health Coverage (UHC) is still a big challenge, particularly among poor and marginalized communities in Africa. One reason for the situation is that the ratio of various cadres of healthcare workers to the rest of the population is still very low.”

- Dr Charles Okehalam, Chair, AMIU Board of Trustees -

“We note with satisfaction that a new 2022-2027 strategy is now in place, and this will guide the development and growth of the university in the next five years in a focused manner that reflects the values of Amref Health Africa.”

- Muthoni Kuria, Chair, AMIU Council -

“We intend to uphold the aspects of diversity, equity and inclusivity in our training. The various African countries from which our graduates originate is an indication that we are indeed traveling the path of observing diversity in our training.”

- Prof Joachim Osur, Vice Chancellor, AMIU -
